

# COLOR

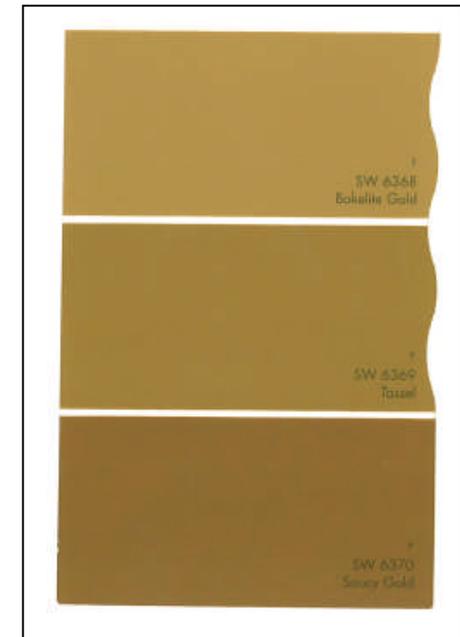

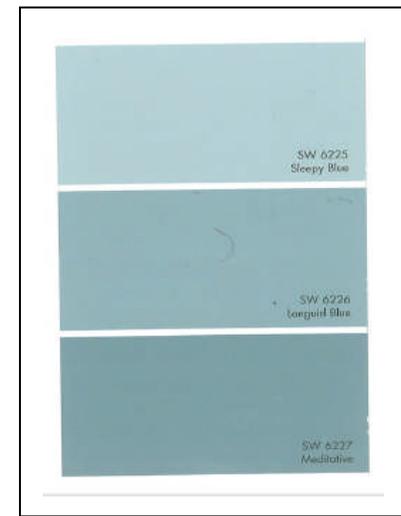

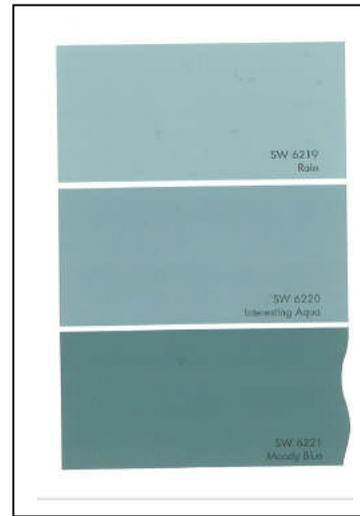

Within the City of DeLand it is required to get approval before painting the exterior of a commercial building. When contemplating changing the color of your building, if it is located in the Historic District or Support District keep in mind, there is a color chart. If you are unsure it is always safest to ask.

The City of DeLand Color Chart is available to view at City Hall, 120 S. Florida Avenue,  
1<sup>st</sup> Floor in the Planning/Building Dept.

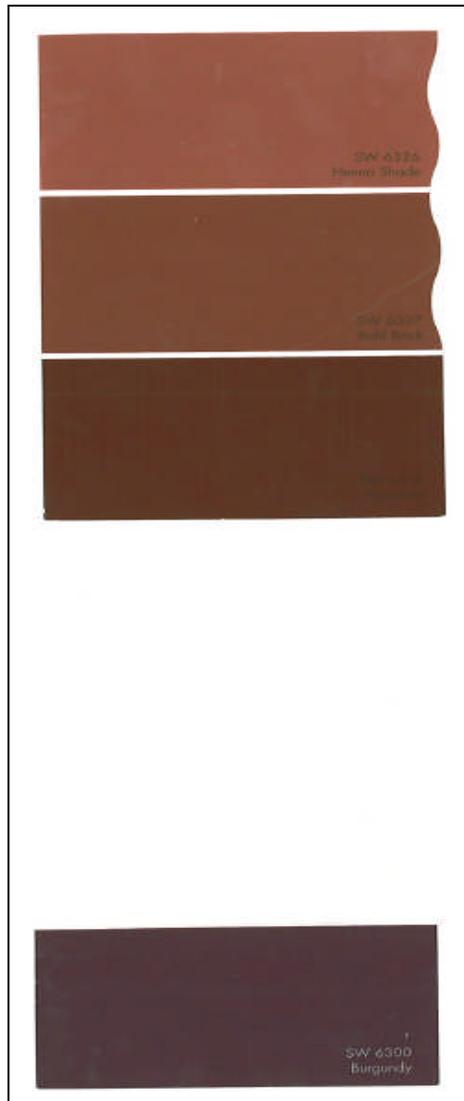

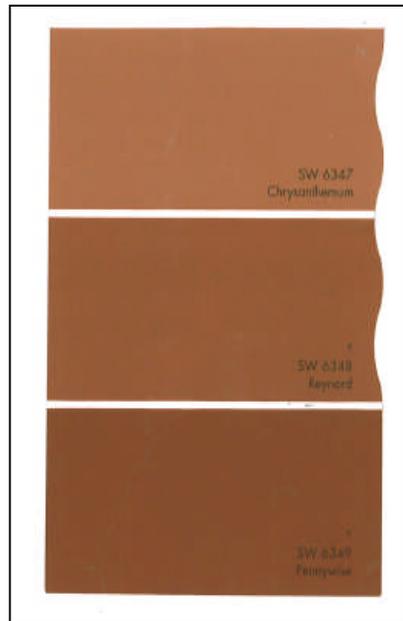

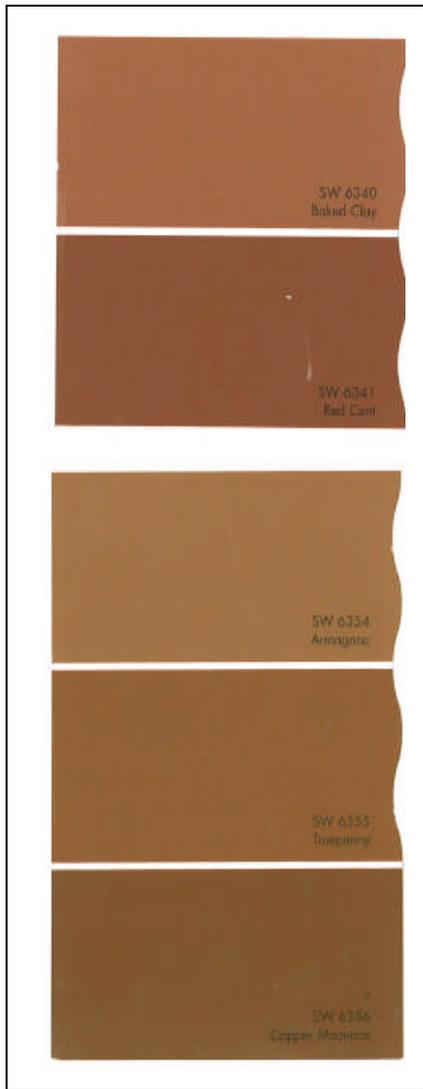

The chart uses Sherwin Williams swatches.

The following is a digital rendering of the color chart, however it is best to come see the colors in person because different computer monitors/tablets depicts color differently. You also need to get approval before you paint.

Color is important....

Current color scheme

Below is a building in the downtown digitally recolored to show what it would look like in different colors.  
Not all color schemes are appropriate or work well together.

Example I, using different colors

Example II, using different colors
